3-6W Bronze

These fittings are manufacture in Great Britain and not only do they come in many different colours, subject to a slight cost increase dependant on quantity, you can also have plates to suite different applications for fixing, please enquire.

Our Micro fittings have a 15mm diameter module, making the fitting very small.

Our Mini fittings have a 28mm diameter module, allowing the input power to increase to 6 watts, for a balance of life and output we recommend running the current at 500mA for 2W & 6W and 350mA for the 1W & 3W
